WTR8200 – TOUCH THERMOSTAT

The WTR8200 Warmset thermostat is specially designed for floor heating system control and allows accurate temperature regulation for significant energy savings. The simple and clean line and the practical touch screen display make it an object that is well coordinated with home furnishings. It is equipped with a function that controls the temperature of the house and the floor, and allows a combined action, as well as a daily and weekly schedule. It also adds other convenient features such as holiday mode, ECO or antifreeze.
